Computer Science Undergraduate | Full Stack Web Developer |  
GDG App domain Core Member | SIH 2k24 Qualifier | Educathon  
2k25 finalist | NextJS  
Patna, Bihar, India

## Summary

### About Me

I'm Saurabh Kumar, a Computer Science student at Netaji Subhash Engineering College and a passionate full-stack developer who loves building modern, scalable, and user-focused web applications.

I work professionally with clients to build end-to-end web app solutions, delivering seamless service, clean architecture, and fast development. I specialize in both MERN Stack and Next.js, and I craft high-quality, professional, and interactive UI at an affordable price.

I enjoy understanding how computers work, how systems interact, and how to translate real-world ideas into working digital products. I've also started exploring DevOps to improve deployment, automation, and reliability in my projects.

I actively participate in hackathons like Smart India Hackathon (SIH) 2024 and Hackfest, where I collaborate with teams and build innovative solutions under tight deadlines. These experiences strengthened my problem-solving, teamwork, and project execution skills.

I'm always open to opportunities to build impactful products, work with new teams, and keep learning and growing in the tech world.

### # Skills & Tech

JavaScript, C, Python

React, Next.js, MERN Stack

SQL, MongoDB

UI/UX for professional & interactive interfaces

Exploring DevOps
